AUTOMATIC ABRASIVE CUTTING MACHINES

Fully AUTOMATIC ABRASIVE CUTTING MACHINES Type ASM with Bar Magazine, Automatic Feeder and Touch Panel for the accurate abrasive cutting of harden steel and other exotic materials with an accuracy of +/- 0,05mm (.002"). All machines are easy and quick to set up and can adapt cutting-wheels of up to 300 mm (12 "), have automatic surface speed adjustment control and will also adjust the cutting position to compensate for wheel wear in order to reduce valuable production time.

The machines can be optional delivered with : - 3000 mm (6') or with a 6000 mm (12') bar-loader.

- First and last cut sorting device
- Automatic Wheel change system
